ANDREW GRANT
FRONT-END DEVELOPER

ABOUT ME

Based in Berlin I have recently graduated from a Full Stack web development bootcamp with the aspiration to switch my career and make my way into the tech community. I am excited by the learning opportunities that programming has presented to me and find it exhilarating seeing my ideas come to life. I am now looking to find a junior opportunity in a great company

PROJECTS

SWEET PAW

https://sweet-paw.herokuapp.com/pets/new

- Working in 3 person team we designed, built and shipped to heroku an 'Airbnb' style app for swapping pets
- Built in Ruby on Rails utilising Active Record, Cloudinary Javascript, HTML and CSS

BOOK BUDDY

https://www.book-buddy.me/

- Final group project for Le Wagon, a mobile app to swap or sell books
- Designed with Figma, we integrated Google Books API and used Postgres SQL to store Data
- Built with Ruby on rails, SCSS and Javascript and Stimulus

EXPERIENCE

My chef career presented me so many great opportunities in different environments with a diverse group of people, teaching me the importance of **collaboration**, good **communication** and the balance of being **adaptable** and open minded but also knowing when to **think critically** and make decisions. passing those skills on to others taught me **patience** and how to provide **constructive feedback**
